

PURIFY AND PURGE

ILLEGAL FEELINGS

*CONTEMPORARY SCIENCE IN COMBINATION WITH
UR-WESTERN TECHNOLOGY AND TRADITION
PRODUCE*

**A CUTTING-EDGE METHOD
FOR HEALING THE MINDBODY**

HE WHO HAS NO FEAR OF GOD, HAS NEITHER SHOES NOR TAIL

- LEADERSHIP OF WESTERN CIVILIZATION, 2001

Western Civilization was founded upon the Objectivity of *dice*: in particular, the Roman innovation of the 6-sided die, carved from ivory¹. Dice were Innovated in the Republic of Ancient Rome, in the Greek Senate; the conquered Elephant population obediently donated their tusks to Greatness. Thereafter, this sound technology was ever instrumental in securing the Greater Greatness of the Empire.

Concurrently, the traditional Coin Toss was an essential part of the Gladiator tradition. Gladiators, those Brave men, embodying all the *chiaroschuro* of Empires, self-contained symbols of human perseverance and willpower, submitted gladly to the binary declaration of the coin's inscription. This declaration was later inscribed in the Bible: *Headsus Versus Tailsus*.²

Gladiators proudly fought to the Death, hoping to enter Valhalla. So essential and wholly accepted was the dualistic principle of the Coin Toss, that no unproductively indistinct or non-optimal modality (as suggested in the spiritually diseased neologism "non-binary") was ever recognized or used, in any situation or under any circumstances, in that Golden Era of Rome.

These technologies worked so well and upheld Western Civilization's values so totally for one simple reason: *Physics is inherently Moral*. The Moral Arc of Gravity is absolute, trustworthy, and redeems the Mess that is Mass. Only Western Civilization has understood this Scientific Fact from the beginning.³

What's more, as great Western Philosophers and Scientists have shown time and time again, Biology, too, reflects a Moral system, stretching back to Eden itself. In fact, groundbreaking new research suggests Moral Contamination has Biological markers⁴ (also known as "biomarkers"). A simple brain scan using magnetic resonance can now detect and even pre-empt the first signs of Moral Corruption--yes, those early, ghostly smears on the mindbody known as Illegal Feelings.

Illegal Feelings are now recognized by scientific consensus as direct precursors to most known pathological outcomes, both medical and sociological.

Let that sink in. *Most known pathological outcomes have a single, scientifically detectable origin*. Thankfully, there is now a simple method to protect yourself and your family from this entire spectrum of pathological outcomes--and as a reader of the English language, it is your birthright! Read on to understand just how easy it really is.

- 2 Coins bearing this inscription can be viewed at the Metropolitan Museum of Art in New York City, or the Smithsonian Museum in our Great Nation's Capital.
- 3 Communists, Asians and other populations of lesser Importance have tried to discredit this premise for millenia--but they have always been defeated by Science.
- 4 Flagg, Measles, Pelosi et al, "Dental Irregularities of Adolescents Suffering from Intrusive Thoughts of Karate Melee Scenarios." Double-Blind, In Vivo. Johns Hopkins: 2018

HOW? (OVERVIEW)

The tragic outcome of Moral Contamination has been documented on all seven continents, most major cities, and nearly every dimension accessible via Germany's Large Hadron Collider and the LIGO laser detection system.

Thankfully, the One and Only proven⁵ Qualitatively *and* Quantitatively superior Civilization has passed down and granted you this proven method by which to protect yourself. Now, you may use our simple diagnostic tool --developed over millenia by Western Philosophical Traditions (and conveniently outlined in this brochure)!

The diagnostic experience should be physically painless, but we are required to warn you that there is risk of mild to moderate Emotional Impact. However, scientific consensus recognizes this as "an acceptable level of risk, given the broad benefits of early detection of Illegal Feelings⁶."

This brochure contains complete instructions for the initial self-diagnostic. It can be performed in the privacy of your home.

For the most accurate results, follow the instructions closely. If necessary, watch the included informational video multiple times.

After your diagnostic has been conducted, check your results: refer to the index of results on **page 4**.

Then, follow the further instructions outlined on **page 5**: film and submit your confession together with your Self-Diagnostic results.

We have partnered with QuestDiagnostics to offer a discounted magnetic resonance brain scan (MRI) with every newly submitted confession. *Please note that only COMPLETE confessions with ALL fields accurately filled out, including up-to-date contact information for both patient and witnesses, will be eligible for this offer.*

After your self-diagnostic results, confession and MRI scan have been received by our offices (and, if deemed necessary, by law enforcement), you will be contacted with your unique treatment plan. If Illegal Feelings or further signs of Moral Corruption are detected, interventions will be pursued in line with the most cutting-edge standards of mindbody treatment.

With the power of modern scientific technology plus the time-tested insight of Ur-Western philosophical traditions, you can ***Rest easy, knowing your physical, psychological and moral health are in good hands!***TM

FURTHER REFERENCES

Biomarkers of Moral Contamination are located in the mindbody: namely, in the brain and sometimes in the body. Pre-developed biomarkers are best known to take the form of Illegal Feelings. Illegal Feelings have recently been linked by numerous independent studies⁷ to Haunting⁸, Wandering⁹, Idolatry¹⁰, Non-Optimal Nutrition¹¹, Inner Compass Failure¹², and Criminal Arrogance¹³. However, early detection and monitoring of Illegal Feelings has been shown by a cross-disciplinary team of experts to greatly reduce most pathological outcomes and maximize a patient's likelihood of overcoming Moral Contamination and maintaining Moral Wholeness across the lifetime. Our simple, empirically certified and holistic therapy method can bring about Grief, Fear, Pacification; ideally, all of the above. For maximum therapeutic effects, ongoing monitoring of Moral Condition by qualified professionals is always recommended.

HOW? (INSTRUCTIONS)

1. Self-Diagnostic

Part A: Use the six-sided die provided with your brochure. *Roll* once.

(NOTE: FOR YOUR SAFETY, DO NOT USE NONTRADITIONAL DICE IN ANY OTHER POLYGON-FORM) Record the number you have rolled. DO NOT RE-ROLL.

Part B: Use any American coin. *Flip* once. (NOTE: DO NOT USE PLASTIC COINS. DO NOT USE FOREIGN CURRENCY.) Record your results (e.g., of "heads" or "tails.") DO NOT RE-FLIP.

2. Read Results

Consult the disambiguation in **APPENDIX A** of this brochure on page 4 (opposite) for preliminary information on your unique biomarkers.

IMPORTANT: As you consider this preliminary feedback on your Self-Diagnostic results, carefully watch the **recorded Message from Leadership** (in a public venue in full view of security camera and ideally with a Witness). **Commit to Memory the Goal of Purgation**. Ask a certified Contractor if anything is Unclear.

3. Sign In

Fill out the attached form with your Self-Diagnostic results. When filling out the form, give your full legal Name and any Internet Names. *Do not Confess your feelings yet*. If accompanied by a Witness, list also their name(s).

Do a quick self-scan:

Do I understand where in the mindbody my Illegal Feelings are located?

Do I understand how and when they developed?

Do I understand the goal of purgation?

Do I have a device with sufficient storage for a short video?

4. Voluntary Confession

For best results, film your confession in the highest available resolution (anything lower than 720p, or shorter than 6 minutes, is not acceptable). Begin with the Script on page []. Then, continue in a Personal tone. Give details and *always remember the 5 "W's" discovered by Journalism*¹⁴: Who, What, When, Why, Where, Why, What, When, Why or Why Not, How Many people were involved, Whether or not there was an Event. If you are unsure what Else to Say, be sure to Berate your Sick self, your Enablers, your so-called Comrades in Feeling, and False Ways.

5. Submission

Under #IllegalFeelings, post your confession (with attached Sign In form, including Self-Diagnostic results) to your local law enforcement facebook or instagram group. **Within 3-5 business days you will be rewarded with a private link offering a discounted brain scan, provided by our partner, QuestDiagnostic.**

APPENDIX B: RESULTS MEANING

ROY *Non-Age-Appropriate Fantasy of Roaming Without Regard for Roads:* Biomarker (usually located in Southern cerebellum) associated with irresponsible fluidity of personhood, hypermobility of joints and cartilage, methamphetamine addiction. Studies suggest possible links to schizophrenia; conclusively linked by modern research to career instability, diarrhea, foot pain. Treatment plan must include domestic qualifiers.

GEE *Slang, Profanity and Colloquialism Vectorhood:* Biomarker located in the hind quadrant of the brain, linked with perverse fetish for so-called 'postmodern' indeterminacy in forms such as indecision, stuttering, dental and lingual irregularities. Linked by sociologists to high rates of miscegenation, low rates of graduation and homeownership. Early detection and purification has been shown to reverse these outcomes when combined with supportive digital censorship and behavioral therapy placing limitations on intergenerational mingling.

BTV *Resignation to Imperfect Mindbody Manifestation with Allegiance to Flaws:* Skin-borne (in all but 4% of cases) biomarker indicating cause for dubious humanity, possibly as a conscious agenda. Comorbid with Oppositional Defiant Disorder (ODD), acne, dehydration headaches, compulsive dishonesty, emotional dysregulation impacted by inclement weather. BIV is regarded by some subfields as one of the most difficult Illegal Feelings to Purge due to the statistically non-infrequent presence of superficial enjoyment reported by the patient, in some cases presenting as an indulgent persona developed around the Notion of Personal Flaw.

DRY *Reproductive Lisp*: A failure to articulate the modern genome. Biomarker (spinal cortex; in 1% of cases, pelvic area) historically associated with homosexuality, promiscuity, non-weekend frivolity; modern scientific consensus confirms these links and adds also, kidney concerns, anemia, male osteoporosis, and, in 10% of cases, delusions of neological "dysphoria." Linked by researchers with high rates of divorce, lack of organic interest in reproducing or developing Western Civilization.

AGONY *Geriatric Convoluted or Mythical Reasoning*: Biomarker associated with tendencies toward cognitive distortion, with statistical links to alzheimers, migraine, fibromyalgia, and psychosomatic ailments. Effect sometimes not visible until after retirement age; however, early intervention and lifelong monitoring is the best way to prevent emotional and moral dysregulation. Evidence-based treatments include special diet plans, DBT and, in some cases, knee surgery.

DENT *Order-Cannibalistic Euphoric Abandon*: Biomarker situated (in nearly all cases) behind the occipital lobe adjacent to the brain stem. Clinical threshold for diagnosis requires at least four of the six fundamental 'ELGROY' signs: Excessive workaholism, inappropriate Laughter, tone-deaf Glee, Risk-taking behavior, Oily skin, and/or Yeast infection in the eyelids. Research suggests that for best outcomes, DENT patients must not be permitted to occupy positions of authority in productive organizations or family units.

CLIP Dignity-Seeking Skeletal Instability: Contemporary medicine understands this condition as a hormonal imbalance with wide-reaching effects; its biomarker was only just recently isolated in the right hemisphere of the brain. A cluster of effects characterized by aggression, impulsivity, growth irregularities, compulsive rejection of traditional principles. Research has linked CLIP patient status with a host of criminal tendencies as well as difficulties with muscular development, malnutrition and, in 30% of cases, also with sleep apnea.

TAP Public Hysteria: Found by survey studies to be one of the most common Illegal Feelings in North American sample populations, and one of the first to be conclusively linked to thyroid malfunction, poverty, obesity, rudeness and poor balance. Recent data also suggests connections between presence of TAP biomarker and allergic rhinitis, contact dermatitis, oral herpes, fungal infection of the nails and hair, and moderate occurrences of family dysfunction in the form of custody disputes stemming from Woke and Feminist ideology. Evidence-based therapies include tanning beds, vitamin C supplementation, ivermectin therapy and topical applications of vasilene.

SHAX Inclement Athletic Arrogance: Biomarker in the left frontal quadrant of the brain. Known by some fields as the 'man cave' condition for its extremely high correlation with maladaptive masculinity, this Feeling is associated in medical literature with antisociality-cluster outcomes, as well as tendonitis, jaw and dental irregularities, poor eyesight, lack of professional initiative, and, in severe cases, high rates of public performance. Patients suffering from SHAX often start arguments while exhibiting muscle spasms of the diaphragm known as 'hiccups.' Statistics suggest that with continual monitoring, prognosis is generally good.

PIE Treasure Troll Syndrome: Suspected to be caused by contact with higher-dimensional (5D+) life forms, *almost always reported by patients as appearing benevolent*, but correlated by extensive research with grave medical consequences. In almost all cases, biomarker is found deep in grey matter of the brain. Conclusively linked by multi-decade survey studies to problems in executive functioning and the ability to maintain rational priorities. Further sociological research also links this condition to poor job performance, high rates of unemployment, and expressions of complacent satisfaction despite squalid living conditions. Treatments include medically induced sleep deprivation, ideally with redesign of the patient's living space.

TORNGARSUK Dire Mammalian Urges: Biomarker theorized to be present in the spinal chord; associated with daydreaming and pretensions of artistry, vitamin B deficiency, many rare cancers, cervical issues in women, traffic violations and parking tickets. Further research correlates this condition with high rates of arrest for engaging in ridicule. Among the most serious, hard-to-treat Illegal Feelings; to-date, there is no treatment consensus.

SLOTH Equilibrium-Shattering Gluttonous Curiosity: Biomarker linked to respiratory irregularities, poor liver function, and, in severe cases, multilingual decentering of Western traditions. Obsessive-Compulsive Disorder (OCD) may be present, often presenting with alcoholism. Theorists suggest media portrayals of immigration may play a role in explosive rates of SLOTH in recent decades; however, more research is needed to pin down the mechanism.

SCRIPT

Press 'record' on your phone or digital camera. Then, read the following text loudly and clearly:

The Law is a sacred pact with Western Civilization's Leadership. It reflects the Moral Arc of Physics and Biology.

The Law exists to protect me from the Pain of Aimless Wandering, Burden of Decision, Unsheltering Fray, and Destructive Millenary Earthquake.

My Feelings Harmonize with the Law. The Law Heals Me. I seek protection, productivity, and peace through Wholeness.

I am ready to purge the mindbody of Moral Contamination.

I will avail myself of the Guarantee and Promise of Health, Wholeness and Prosperity that are my birthright as an inheritor of Western Civilization.

I am ready to receive my Spiritual Heritage.

Continue by naming Illegal Feelings identified in the Self-Diagnostic and, if applicable, any other suspected additional feelings.

Give details and always remember the 5 "W's" discovered by Journalism: Who, What, When, Why, Where, Why, What, When, Why or Why Not, How Many people were involved, Whether or not there was an Event.

If you are unsure what Else to Say, be sure to Berate your Sick mindbody and its origins, your Enablers, your so-called Comrades in Feeling, and False Ways.

When you are finished recording, refer to the instructions on PAGE 5 for submission instructions.
